A PETITION

To the Honorable House of Commons, in Parliament Assembled:

The Trans-Labrador Highway is a vital transportation lifeline for Labrador communities, providing access, generating economic activity, and allowing residents to obtain health care and other public services.

Labrador cannot afford to wait years or decades for upgrading and paving of Phases II and III of the Trans-Labrador Highway and the Labrador Straits portion of the Trans-Labrador Highway, which form part of the National Highway System.

We, the undersigned, your petitioners, call on the Government of Canada to provide additional funding for much-needed improvements to the entire Trans-Labrador Highway.
